

JUSTIN DWINATA

Jakarta, Indonesia | 082280004235 | justindwinata0@gmail.com | linkedin.com/in/justindwinata | github.com/Justindwinata

PROFESSIONAL SUMMARY

Third-year Informatics Engineering student at Universitas Mercu Buana with a GPA of 3.91/4.00. Interested in Web Development, Data Analysis, and Application Development, with hands-on experience building web applications, mobile applications, database-backed systems, and data-oriented projects. Experienced in frontend development, PHP/MySQL backend development, Flutter mobile development, REST API integration, and network support. Strong analytical mindset, systematic working style, and ability to translate user requirements into functional technology solutions.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, PHP, SQL, Dart

Frontend Development: HTML, CSS, JavaScript, React, TypeScript, Vite, Responsive Web Design

Backend Development: PHP, FastAPI, REST API, API Integration

Database: MySQL, SQL, SQLite, PostgreSQL

Data Analysis and Visualization: Python, Pandas, Excel, Power BI, Data Visualization

Mobile Development: Flutter, Dart, Cross-Platform Application Development

Networking: Mikrotik, LAN/WAN, Routing, Network Troubleshooting

Tools: Git, GitHub, VS Code, Postman

PROJECTS

CareerBoost AI - Resume Analysis and Career Readiness Platform

- Built a resume analysis platform using React, TypeScript, FastAPI, and SQLite to help users review CV structure and application-target alignment.
- Implemented PDF upload, validation, text extraction, section detection, ATS metadata, skill signal detection, target criteria input, saved history, result detail pages, and downloadable HTML reports.
- Developed deterministic target alignment, frontend/backend tests, responsive UI, accessibility improvements, and documentation for a portfolio-ready full-stack application.

JustBer - Rekening Bersama / Escrow Application

- Developed an escrow application workflow using Flutter and Supabase, including authentication, contract rooms, wallet balance, chat messages, transaction status, withdrawal requests, and admin review flow.
- Designed seller-buyer transaction states from room creation, buyer payment, shipping, buyer confirmation, balance release, and dispute handling.

Pneumonia Detection Web App - Medical Image Analysis

- Built a web-based inference application for pneumonia detection from chest X-ray images, including image upload, prediction output, model inference workflow, and explainability/reporting improvements.

CCTV Anomaly Detection - Real-time CCTV anomaly detection

- program is a real-time CCTV anomaly detection system that analyzes webcam, uploaded video, local CCTV footage, or RTSP/IP camera streams to classify activity as NORMAL or ANOMALY. It combines motion area analysis, optical flow, sudden movement spikes, scene-change detection, optional autoencoder-based visual reconstruction, and optional human or zone tracking to identify suspicious events such as theft, vandalism, violence, unusual objects, or abnormal movement patterns.

WORK EXPERIENCE

Freelance Web & Application Developer | 2024 - Present

- Developed responsive websites using HTML, CSS, JavaScript, and PHP based on client requirements.
- Designed and managed relational databases using SQL and MySQL for application data storage.
- Built mobile applications using Flutter with PHP backend integration and MySQL database support.
- Performed testing, debugging, and performance optimization to improve application reliability and user experience.
- Communicated directly with clients to analyze system requirements and implement practical technology solutions.

Network Support Intern - CV. Inti Multi Solusi | Feb 2022 - May 2022

- Configured and managed Mikrotik devices for user network requirements.
- Assisted with LAN/WAN installation, configuration, and troubleshooting.
- Supported network performance optimization to improve stability and system security.
- Collaborated with technical teams during infrastructure deployment and maintenance activities.

EDUCATION

Universitas Mercu Buana - Jakarta, Indonesia | 2023 - Present

Bachelor of Informatics Engineering | GPA: 3.91/4.00

CERTIFICATIONS

- Data Analysis with Python - Coursera, 2026
- CCNA: Switching, Routing, and Wireless Essentials – Cisco, 2026
- CCNA: Enterprise Networking, Security, and Automation – Cisco 2026
- CCNAv7 - Cisco Networking Academy, 2024
- Computer Network Engineering Qualification Level II - BNSP, 2023
